KENNETH STEVEN B. BERNAL

TECHNICAL / IT VIRTUAL ASSISTANT

Las Pinas City, Metro Manila, Philippines | 09102890560 | kensbernal@gmail.com

OBJECTIVE

Detail-oriented Computer Engineering graduate with hands-on experience in technical support, full stack development, and remote systems. Completed on-the-job training at DOST-PTRI, a national government agency, supporting live-streamed national events, troubleshooting in real time, and improving an HRIS system. Proficient in remote collaboration tools and technical problem-solving — ready to deliver reliable and proactive virtual support to clients worldwide.

SKILLS

Technical: Technical Support, Full Stack Development, Remote Desktop Support, UI/UX Design, Real-time Troubleshooting, Hardware Programming (ESP32/Arduino)

Tools: VS Code, GitHub, Vercel, Google Workspace, Microsoft Office, Zoom, Discord

Soft Skills: Fast Learner, Team Coordination, Time Management, Attention to Detail, Communication, Problem Solving

EXPERIENCE

Department of Science and Technology – Philippine Textile Research Institute 2025

Technical Support Intern (OJT) & Full Stack Developer (OJT) *Taguig City, Metro Manila, Philippines*

- Provided remote and on-site technical assistance across DOST-PTRI events, including equipment setup and troubleshooting.
- Coordinated with event organizers and staff to align camera work and broadcast flow with the program schedule.
- Enhanced the Human Resource Information System (HRIS) as a full-stack developer, working on front-end interfaces and back-end functionality using VS Code, GitHub, and Vercel.
- Debugged and fixed back-end issues in the data-fetching logic for end-user and HR accounts, ensuring accurate retrieval and display of user records.
- Utilized Google Workspace and MS Office for documentation, reporting, and remote collaboration with team members.

PROJECTS

Biometric-Enhanced Add-on Ignition Security System for Motorcycles 2025 – 2026

Programmer & Hardware Developer

- Designed and built an ESP32-based add-on ignition security system using fingerprint authentication as the primary access method, with a key-based emergency override and relay-controlled ignition.
- Programmed Arduino C++ firmware for fingerprint enrollment, emergency key detection, crash/tilt detection, OLED display, GPS tracking, and SMS-based remote control including GPS-tagged owner alerts.
- Tested and debugged the prototype, achieving 0% false acceptance in fingerprint verification and 100% accuracy in emergency key detection, SMS command execution, and crash detection.

EDUCATION

Bachelor of Science in Computer Engineering 2026

Catanduanes State University *Calatagan, Virac Catanduanes*

CERTIFICATIONS & LICENSES

- Career Service Professional Eligibility
- Foundation of Operationalizing MITRE ATT&CK v13 (AttackIQ Academy)
- Networking Basics (Cisco Networking Academy)
